## THEOREMS AND DEFINITIONS. FURTHER.

18. The sum of the angles of a triangle is equal to two right angles.  
 19. If the sides of a convex polygon are produced in order, the sum of the angles so formed is equal to four right angles.  
 20. If two triangles have two sides of the one equal to two sides of the other, each to each, and also the angles contained by those sides equal, the triangles are congruent.  
 21. If two triangles have two angles of the one equal to two angles of the other, each to each, and also one side of the one equal to the corresponding side of the other, the triangles are congruent.  
 22. If two sides of a triangle are equal, the angle opposite to those sides are equal; and the converse.  
 23. If two triangles have the three sides of the one equal to the three sides of the other, each to each, the triangles are congruent.  
 24. If two right-angled triangles have their hypotenuses equal, and one side of the one equal to one side of the other, the triangles are congruent.  
 25. If two sides of a triangle are unequal the greater side has the greater angle opposite to it; and the converse.  
 26. Of all the straight lines that can be drawn to a given straight line from a given point outside it, the perpendicular is the shortest.  
 27. The opposite sides and angles of a parallelogram are equal, each diagonal bisects the parallelogram, and the diagonals bisect one another.  
 28. If there are three or more parallel straight lines, and the intercepts made by them on any straight line that cuts them are equal, then the corresponding intercepts on any other straight line that cuts them are also equal.

## AREAS.

29. Parallelograms on the same or equal bases and of the same altitude are equal in area.  
 30. Triangles on the same or equal bases and of the same altitude are equal in area.  
 31. Equal triangles on the same or equal bases are of the same altitude.  
 32. Theorem and explanation of the quadrilateral theorems corresponding to the following algebraical identities:—

$$\begin{aligned}
 (a+b+c+\dots+n)(a+b+c+\dots+n) &= (a+b+c+\dots+n)^2 \\
 &= (a+b)^2 + 2ab + c^2 + 2c(a+b) + \dots + n^2 + 2n(a+b+c+\dots) \\
 &= a^2 + b^2 + c^2 + \dots + n^2 + 2(ab+ac+ad+\dots+an)
 \end{aligned}$$

33. The square on a side of a triangle is greater than, equal to, or less than, the sum of the squares on the other two sides, according as the angle contained by those sides is obtuse, right, or acute. The difference in the case of inequality is twice the rectangle contained by one of the two sides and the perpendicular on it of the other.

## LINES.

34. The locus of a point which is equidistant from two fixed points is the perpendicular bisector of the straight line joining the two fixed points.  
 35. The locus of a point which is equidistant from two intersecting straight lines consists of the pair of straight lines which bisect the angles between the two given lines.

## THE CIRCLE.

36. A straight line, drawn from the centre of a circle to bisect a chord which is not a diameter, is at right angles to the chord; conversely, the perpendicular to a chord from the centre bisects the chord.  
 37. There is one circle, and one only, which passes through three given points not in a straight line.  
 38. In equal circles (or, in the same circle) (i) if two arcs subtend equal angles at the centres, they are equal; (ii) conversely, if two arcs are equal, they subtend equal angles at the centres.  
 39. In equal circles (or, in the same circle) (i) if two chords are equal they cut off equal arcs; (ii) conversely, if two arcs are equal, the chords of the arcs are equal.  
 40. Equal chords of a circle are equidistant from the centre, and the converse.

## [SECTION IV.]

## THE CIRCLE.

41. The tangent at any point of a circle and the radius through the point are perpendicular to one another.  
 42. If two circles touch, the point of contact lies on the straight line through the centres.  
 43. The angle which an arc of a circle subtends at the centre is double that which it subtends at any point on the remaining part of the circumference.  
 44. Angles in the same segment of a circle are equal; and if the line joining two points subtends equal angles at two other points in the same circle, the four points lie in a circle.  
 45. The angle in a semi-circle is a right angle; the angle in a segment greater than a semi-circle is less than a right angle; and the angle in a segment less than a semi-circle is greater than a right angle.  
 46. The opposite angles of any quadrilateral inscribed in a circle are supplementary; and the converse.  
 47. If a straight line touch a circle, and from the point of contact a chord be drawn, the angles which this chord makes with the tangent are equal to the angles in the alternate segment.  
 48. If two chords of a circle intersect either inside or outside the circle, the rectangle contained by the parts of the one is equal to the rectangle contained by the parts of the other.

## [Section V.]

## PROPOSITIONS: SIMILAR TRIANGLES.

48. If a straight line is drawn parallel to one side of a triangle the other two sides are divided proportionally; and the converse.

49. If two triangles are rectangular, their corresponding sides are proportional; and the converse.

50. If two triangles have one angle of the one equal to one angle of the other and the sides about these equal angles proportional, the triangles are similar.

51. The exterior angle of a triangle divides the opposite side internally in the ratio of the sides containing the angle, and likewise the exterior bisector externally.

52. The ratio of the area of similar triangles is equal to the ratio of the squares on corresponding sides.

No. 245.—The Government does not think it the case of all inferior servants for whom service rules are modified with reference to G.O. No. 145, Finance, dated 29th November 1917, that such employees should be taken to the service rules case in every five years.

I The Superintendent of Stipendiary is requested to arrange to print the service rule with unfilled space for the above purpose.

No. 246.—The following letter from the Assistant-Secretary, Madras, to all Heads of Departments, No. T.M. 25-75-3281, dated 11th December 1924, is published for information:—

[Subject:—Revised procedure for deduction of income-tax from the salaries of Government employees.]

In continuation of my circular No. T.M. 25-75-3287, dated 13th March 1924 on the above subject, I have the honour to acknowledge the receipt of the A.S. Secy. in India in regard to the grant of temporary relief claimed by the assessee under section 17 of the Income tax Act XI of 1915.

It has been held that Treasury officers cannot take the initiative in allowing marginal relief under section 17 of the Act as this would impose an excessive burden of work and responsibility upon them; but that, balancing officers should allow the relief to be deducted at source in cases where the assessee claims the relief, the final adjustment of income-tax being made after the close of the year by the Income tax authorities who are responsible for satisfying themselves as to the eligibility of the relief.

I request that all balancing officers under you may kindly be informed accordingly.

## THE GOVERNMENT SCHOOL OF COMMERCE, CALCUTTA.

[SCHOOL TERM.—JANUARY TO NOVEMBER; TERM—JANUARY TO APRIL AND JUNE TO NOVEMBER; FEARS EXAMINATIONS—FIRST JANUARY; SUPPLEMENTARY EXAMINATIONS—FIRST JUNE; SCHOOL HOURS—7.45 TO 10.45 A.M. AND 3.30 TO 7.30 P.M.]

The school re-opens on the 10th January 1935 after the Christmas.

**Admission.**—Admissions are generally open only to such as have at least been students of the Fifth Form for a full year in a recognized High School. This is generally the minimum general education qualification necessary for admission into the school. A fair knowledge of English, at least such as that ordinarily possessed by a qualified Secondary School Leaving Certificate holder, is necessary to enable the student to profit. The higher the general education qualification, of course the greater will be the benefit derived from the training given in the school, and the capacity to utilize that training to advantage. Admission in the Typewriting class will be given to students above. Those that do merit admission at once will get it later on before they complete their full term in the school.

**School Fees.**—Rates 3 per subject per term, except for typewriting, payable in three equal instalments in the months of January, February and March, and again in the months of June, July and August. The fee for typewriting is Rs. 12 per term also payable similarly. The same rate of fees is charged for each of the grades.

**Subjects and Classes.**—In the English Department, instruction is given in the following six commercial subjects, and students are prepared for the Government Technical Examinations in the Lower and Higher grades in each:—

- |  |                           |
|--|---------------------------|
| (1) Bookkeeping  | (4) Commercial Geography. |
| (2) Theory and Practice of Commerce or<br>Commercial Law and Practice. | (5) Shorthand (Primer's). |
| (3) Banking and Political Economy.                                     | (6) Typewriting.          |

Each of the grades in a subject generally takes a year.

**Time-table.**—The time-table is so arranged as to enable a beginner to study almost all the subjects taught in the school in one and the same year.

**Students of the Typewriting Class.**—are divided into batches, each batch possessing for one hour every school day. This class is held from 7.45 to 9.45 a.m. and from 3.30 to 7.30 p.m. The other classes are held from 10.45 to 12.45 a.m. and from 4.30 to 7.30 p.m. All the classes are held in the morning and evening hours in a well-furnished specially arranged room in day schools or equipped in offices.

**School Term and Examinations.**—The course begins every year in January and ends on 30th November. The first term is from January to April and the second term is from June to November. The Government Technical Examinations in all the subjects and the 'Commerce' are held towards the end of November every year, and the school closes immediately thereafter for the Christmas Vacation and re-opens early in January. The examinations in Shorthand and Typewriting are held in April also, immediately after which the mid-summer vacation begins. The school will re-open about the middle of June after mid-summer. Those that wish to begin the study of commercial subjects and to join the school will, therefore, be admitted only in January every year; and each student must join early in January, or best before the 15th. Admissions may also be made in June for a week after the re-opening of the school in the case of those who might already possess a few weeks of the subjects so as to enable them to join probably the classes then at work.

Students that seek admission in June to the Shorthand and Typewriting classes will be prepared for the Lower grade examinations of April next.
